MAINTENANCE of MATERIAL in STOCK

The "Acquario Due" products, as for all double-firing tiles, if it has to be kept in Stock for long periods, up to 10 days, must be put indoor and in a dry place.

1° PHASE - LAYING

Particular attention and care must be used during this phase, because it will fix the base for a good final result of your project.

We evidence to you that the difference of shade between each tile is not a flaw, but as it is the basic feature of "Acquario Due" handmade work, it exalts the deepness of the color and of the raw material we. Therefore, during the Laying, we suggest you to open every box and control each one before beginning the laying, and going on by picking the pieces from different boxes at the same time, to mix as well as you in the collections characterized by the crackle effect, during the cutting phase, we recommend the use of a suitable diamond disc specific for this kind of product. We recommend the use of clean flowing water. For laying and grouting, we suggest glues and sealants NOT colored and with fine grain. Different finishes will have to be tested before the laying, in an appropriate manner, without compromising the yard. For cutting our ceramic tiles we recommend the Diamond Discs of:

ADI S.p.a. - Viale dell'Economia 12/16 - 36016 - Thiene (VI) ITALY - T. +39-0445-360244 - info@aditools.com

2° PHASE - STAIN TREATMENT

After having verified that the ceramic surface, that has to be treated, is dry and clean, we suggest to apply by brush a uniformly hand of "Craquelet Protector" like MP/90 of FILA. Then you can proceed with grouting.

For the application, and for the removal of excesses, please follow the producer's instructions for the specific treatment.

3° PHASE - FIRST CLEANING AFTER THE LAYING

The first cleaning after the laying is the fundamental presupposition, after a correct laying, made at "Workmanlike". The first cleaning must be made when the grout is still in the plastic stage and it can be easily removed.

It's important that you follow the instructions of the grout's producer, and pay attention to the cleaning and the leveling of the joints; in that regard we remember to use a damp sponge.

4° PHASE - ORDINARY CLEANING AND MAINTENANCE

For daily cleaning of "Acquario Due" products, both floors and walls in ceramic or lava stone, are strongly advised against all acid-based products, both concentrated or diluted with water, it's also We suggest the use of neutral detergents that you can find regularly on the market, applied with clean sponges or cloche, avoiding products with crackle effect to come in contact with soiled water, detergents or other soiled substances that can ruin the characteristic effect.

5° PHASE - MAINTENANCE

We suggest to repeat the Stain treatment once every year on all surfaces particularly exposed to the risk of stain, like as floors, showers or tops.

Before making the treatment, clean the surfaces with "WAX REMOVER" of FABER CHIMICA.

Only when the surface is clean and dry you'll be allowed to proceed with the treatment with the crackle protector like "MP90" of FILA, always following the instruction of the producer.

6° PHASE - EXTRAORDINARY INTERVENTIONS

In the hypothesis that erroneously had been used a detergent based acidic and this leads to the presence of iridescence or assaults to the vitreous surface, we can suggest the recovery by using "POLISHING CREAM" of FABER CHIMICA, with the use of suitable roto-orbital equipment.

At the end of the polishing treatment, rinse with clean water. Always follow the instructions of the manufacturer of the treatment.

N. B.

For more technical information on different products for treatment, cleaning or maintenance, you can write directly to the addresses listed above.

All information in this communication is the result of a long experience and of tests performed both by our laboratory and on site, but cannot be challenging or result in liability for us, as we cannot being able to control the conditions of installation and use of the products.

ACQUARIO Srl declines any responsibility for the use of the products and suggestions.

CONCLUSION

- We recommend buyer of our products to be laid only to professional installers who can guarantee a realization at "Workmanlike"
- The shades of our samples are indicative
- Check on receipt of the product possible combinations of sizes
- No claims will be accepted in the absence of such conditions
- No claims will be accepted on material put in place

SALE'S CONDITIONS
