Dinamika

Van Gogh White

Dinamika riedita il marmo Van Gogh White, estratto dalle Alpi Apuane italiane, dando vita a una superficie dall'affascinante bellezza. Il fondo bianco è attraversato da una grafica leggera nei toni del grigio e da piccole venature aranciate con andamento orizzontale, emerse durante passaggi di sabbiatura, lavorazione Waterjet in superficie, patinatura per rendere il prodotto più morbido al tatto. In questo modo le venature e il movimento grafico acquisiscono effetti di bassorilievo e viene esaltata l'intensità del colore bianco.

Dinamika bietet eine Neuauflage des Van Gogh White Marmors, der in den Apuanischen Alpen in Italien gewonnen wird und eine Oberfläche von faszinierender Schönheit aufweist. Die weiße Grundfliese wird durch ein zartes Muster in Graustufen und kleine orangefarbene, waagerecht verlaufende Maserungen durchzogen, die während dem Sandstrahlen, der Waterjet-Oberflächenbehandlung, entstanden sind. Durch diese Patina erhält das Produkt eine weichere Haptik. Auf diese Weise erzeugen die Maserungen und der Musterverlauf Flachrelief-Effekte und die Intensität der weißen Farbe wird betont.

Dinamika revives Van Gogh White marble, quarried from the Italian Apuan Alps, resulting in a strikingly beautiful surface. The white background is traversed by a light pattern in shades of gray and small orange horizontal veins that emerged during sandblasting, the Waterjet surface process, and patination to make the product softer to the touch. The veins and patterns therefore acquire bas-relief effects, and the intensity of the white colour is enhanced.

Dinamika transforme le marbre Van Gogh White, extrait dans les Alpes apuanes italiennes, avec une surface à la beauté enjôleuse. Le fond blanc est traversé par un graphisme léger dans les tonalités du gris et par de petites veines orangées évoluant horizontalement, apparues après les traitements de sablage, ceux par jet d'eau en surface, ainsi que ceux de patinage qui donnent au produit une plus grande délicatesse au toucher. Le veinage et le mouvement graphique prennent ainsi des effets de bas-relief, et l'intensité du blanc ressort encore plus.

Venature policrome e variegate attraversano una superficie bianca con tonalità che dal grigio scuro passano a quelle del marrone e del viola con punte di giallo e arancio. Le lavorazioni di acidatura leggera e spazzolatura successiva, sulla materia originale, rendono la superficie morbida al tatto, accentuando la ricchezza cromatica delle texture e l'effetto tridimensionale delle venature. Grazie a Dinamika, un marmo dall'estetica intramontabile trova la sua massima espressività in una materia ceramica con qualità tecniche ed estetiche superiori.

Unterschiedliche Maserungen in vielen Farben verlaufen über eine weiße Oberfläche in Farbtönen von Dunkelgrau bis hin zu Kastanienbraun und Violett, mit gelben und orangen Sprenkeln. Die Bearbeitung durch leichtes Ätzen und anschließendes Bürsten des Ausgangsmaterials verleihen der Oberfläche eine weiche Haptik und unterstreichen die farbliche Vielfalt der Texturen und die dreidimensionale Wirkung der Maserungen. In Dinamika findet ein Marmorstein von unübertrefflicher ästhetischer Wirkung seine höchste Vollendung in einem Keramikmaterial mit hochkarätigen technischen und ästhetischen Eigenschaften.

Polychrome, variegated veins run across a white surface with hues shifting from dark gray to brown and purple with hints of yellow and orange. Light acid etching and subsequent brushing processes on the original material make the surface soft to the touch, accentuating the chromatic richness of the textures and the three-dimensional effect of the veining. Thanks to Dinamika, a marble with a timeless aesthetic is perfectly expressed in a ceramic material with superior technical and aesthetic qualities.

Des veines polychromes et bigarrées parcourent une surface blanche avec des nuances qui, du gris foncé, passent au marron et au violet, avec des notes de jaune et d'orange. Sur la matière d'origine, la légère gravure à l'acide et le brossage apportent douceur au toucher, en renforçant la richesse chromatique des textures et l'effet tridimensionnel des veines. Avec Dinamika, un marbre à l'esthétique impérissable atteint le maximum de son expressivité avec une matière céramique flanquée de qualités techniques et esthétiques supérieures.

Onice Verde

Un minerale pregiato attraversato da striature continue nei toni del verde, del bianco e del beige si contamina con accenti ambrati e rosa. Nei passaggi tra una sfumatura e l'altra talvolta è possibile percepire delle leggere scanalature, con piccole inclusioni fossili dall'effetto tridimensionale, caratteristico delle estrazioni controfalta delle pietre naturali. La perfetta coincidenza tra grafiche e strutture sempre diverse, ottenuta attraverso un unico processo produttivo, regala veridicità e profondità a superfici dall'estetica minimale.

Ein kostbares Gestein, durchzogen von durchlaufenden Streifen in Grün-, Weiß- und Beigetönen, durchsetzt mit bernsteinfarbenen und rosafarbenen Akzenten. An den Übergängen zwischen den Farbtönen sind hier und da leichte Rillen mit kleinen fossilen Einschlüssen in 3D-Effekt erkennbar; diese sind charakteristisch für den Schnitt senkrecht zur Ader der Natursteine. Die perfekte Kombination aus immer wieder anderen Mustern und Strukturen wird in einem einzigartigen Produktionsverfahren erzielt, das minimalistischen Oberflächen Ausstrahlung und Tiefe verleiht.

A fine mineral crossed by continuous streaks in shades of green, white and beige is infused with hints of amber and pink. In the transitions between shades it is sometimes possible to perceive slight grooves, featuring small fossil inclusions with a three-dimensional effect characteristic of vein-cut extractions of natural stones. The perfect convergence of ever-varying patterns and textures, achieved through a unique production process, lends realism and depth to surfaces with a minimal aesthetic.

Un minéral prisé traversé par de continues stries dans les nuances du vert, du blanc et du beige, est fourvoyé par des accents ambrés et rosés. Dans les passages entre une nuance et l'autre, il est parfois possible d'apercevoir de légères cannelures, avec de petites inclusions fossiles à effet tridimensionnel, une caractéristique des extractions à contre-passe des pierres naturelles. La coïncidence parfaite entre graphismes et structures sans cesse différentes, obtenue à l'aide d'un procédé de production unique, offre véracité et profondeur à des surfaces à l'esthétique minimaliste.

Moving

Moving è uno dei tre fondi decorati realizzato nell'innovativo formato 120x120 cm per impreziosire la collezione Marble Edition con ricercate quinte scenografiche da abbinare talvolta ai fondi.

Il particolare disegno circolare che si forma accostando tessere di marmi diversi, aventi ognuna la propria tridimensionalità e specificità, evoca il movimento rotatorio dell'acqua riscontrabile nei pavimenti musivi tipici delle basiliche cristiane, i cui soggetti spesso rappresentavano scene sacre o elementi naturali.

Moving ist eines der drei Grundfliesen-Dekors im Format 120x120 cm, die die Kollektion Marble Edition mit auserlesenen Akzentflächen bereichern, welche ab und an mit den Grundfliesen kombiniert werden. Das besondere Kreismuster entsteht durch den Mix von Fliesen unterschiedlicher Marmorarten, von denen jede ihre besondere 3D-Wirkung und ihren eigenen Charakter aufweist. Das Muster erinnert an die kreisenden Bewegungen von Wasser, wie man sie von Mosaikböden in christlichen Basiliken sind. Auf diesen Böden sind häufig heilige Szenen oder Elemente aus der Natur dargestellt.

Moving is one of three decorated backgrounds produced in the 120x120 cm size to embellish the Marble Edition collection with refined scenic backdrops to sometimes match the backgrounds. The distinctive circular pattern formed by juxtaposing chips of different marbles, each with its own three-dimensionality and specific features, evokes the rotational movement of water found in the mosaic floors typical of Christian basilicas, which often featured depictions of sacred scenes or natural elements.

Moving est l'un des trois fonds décorés en format 120x120 cm qui étoffe la collection Marble Edition avec de sophistiquées parures à assortir aux fonds. La forme circulaire particulière qui apparaît lorsque sont mises les unes à côté des autres différentes tesselles de marbres qui ont chacune leur propre tridimensionnalité et spécificité, fait penser au mouvement rotatoire de l'eau que nous pouvons retrouver sur les sols en mosaïques typiques des basiliques chrétiennes, dont les sujets représentaient souvent des scènes sacrées ou des éléments naturels.

Dinamika

Travertino

Dinamika riedita la pietra sedimentaria Travertino dando vita a una superficie intensa e palpante. Piccole inclusioni di fossili animali e vegetali costruiscono un tessuto di materie stratificate ed elaborate nel tempo dove la perfetta sincronia tra struttura e grafica conferisce un risultato iperrealistico.

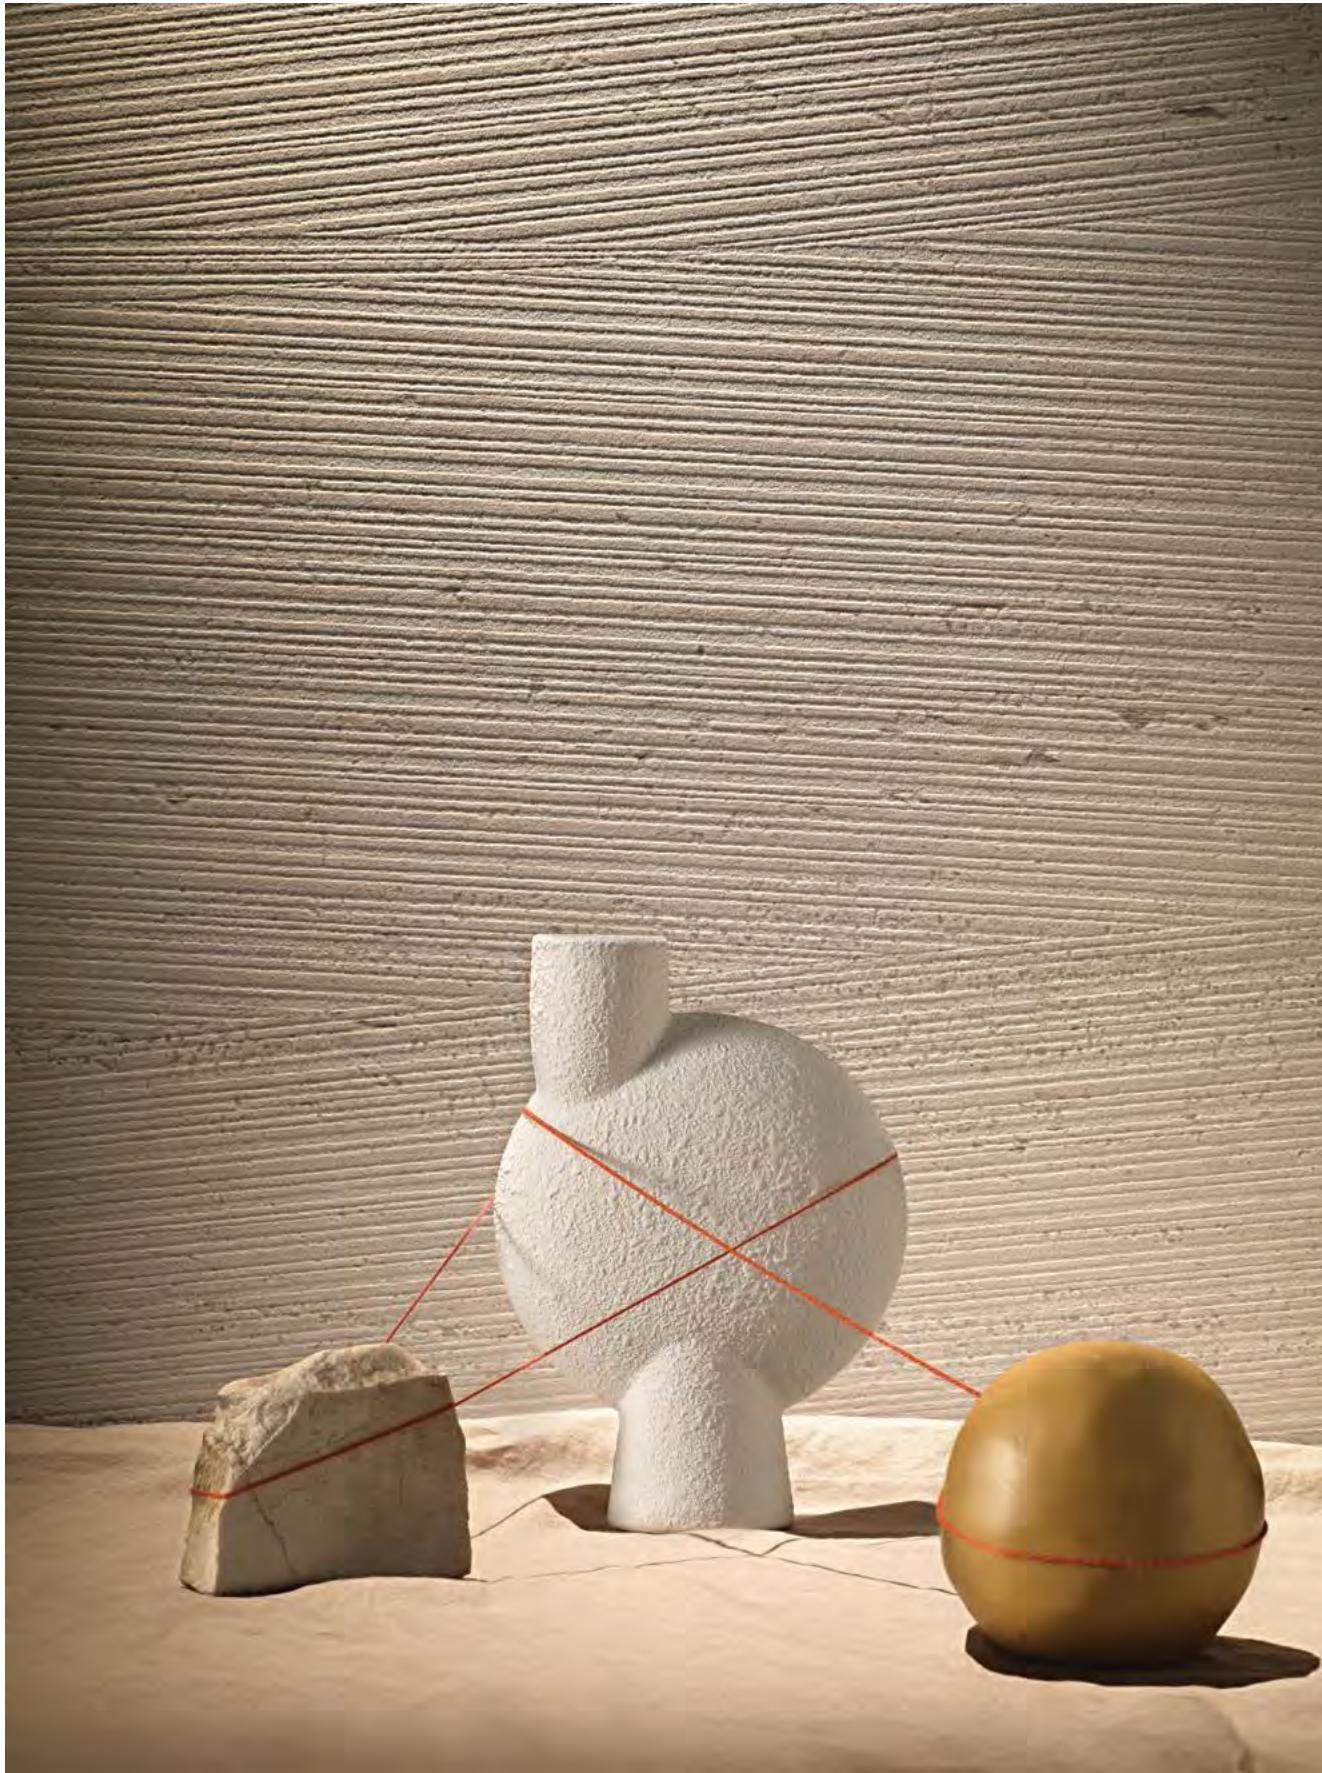

Dinamika ist eine Nachempfindung des Sedimentgestein Travertin und wartet mit einer beeindruckend lebhaften Oberfläche auf. Kleine Einschlüsse von Tier- und Pflanzenfossilien ergeben ein Gefüge aus Stoffen, die sich im Laufe der Zeit schichtweise abgelagert haben. Durch die perfekte Übereinstimmung zwischen Optik und Struktur entsteht ein äußerst realistisches Erscheinungsbild.

Dinamika reinterprets sedimentary travertine stone in a surface that seems to throb with life. Small inclusions of animal and plant fossils construct a fabric of matter, layered and perfected by time, where the flawless synchrony of structure and graphic design creates a hyper-realistic impression.

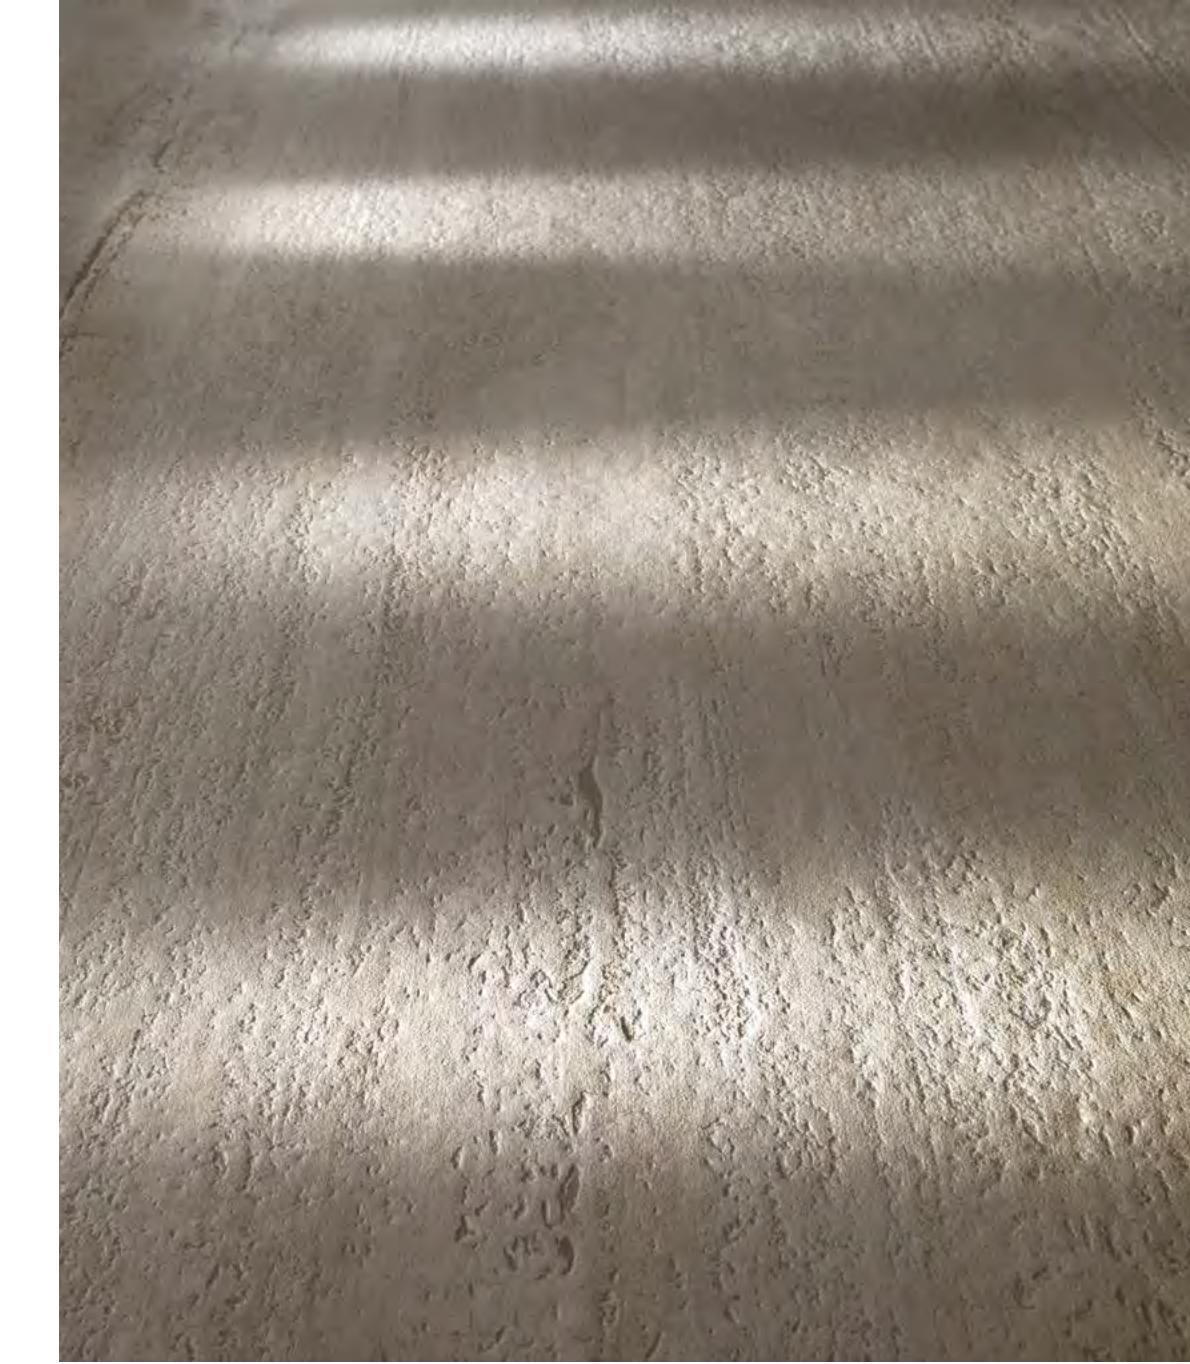

Dinamika repropose le travertin, pierre sédimentaire, avec une surface intense et palpante. De petites inclusions d'animaux et de plantes fossiles tissent des matières stratifiées qui se forment au fil du temps, où la synchronie parfaite entre structure et graphique aboutit à un résultat hyperréaliste.

Pietra Pece

Caratterizzata da una variazione cromatica unica che va dal grigio al marrone scuro, Pietra Pece è l'interpretazione di una superficie trattata con polveri e pigmenti scuri di diverse granulometrie per creare effetti di alto e bassorilievi. Una materia dalla tridimensionalità esclusiva che invade i sensi e la cui valenza tattile diventa elemento distintivo di Dinamika.

Pietra Pece zeichnet sich durch besondere Farbverläufe von Grau bis Dunkelbraun aus und ist die Interpretation einer plastischen Oberfläche mit Hoch- und Flachreliefs, die durch die Behandlung mit dunklen Pulvern und Pigmenten verschiedener Korngrößen erzielt wurde. Il decoro è stato realizzato con oro giallo e materie metallizzate pertanto il fondo decorato può essere posato solo a parete. Il decoro non è resistente all'usura da sfregamento sia in fase di posa che post posa. Per la pulizia quotidiana si consiglia di utilizzare un panno umido impregnato di acqua o prodotti neutri.

The decoration was created with yellow gold and metallised materials and therefore the decorated background tiles can only be laid on walls. The decoration is not resistant to rubbing wear either during installation or post installation. For daily cleaning, it is advisable to use a wet cloth soaked in water or neutral detergents.

Das Dekor wurde mit Gelbgold und metallisierten Materialien hergestellt, deshalb kann die dekorierte Bodenfliese nur an der Wand verlegt werden. Das Dekor ist sowohl bei der Verlegung als danach gegen Scheuern nicht abnutzungsbeständig. Zur täglichen Reinigung wird grüten, ein feuchtes, mit Wasser oder neutralen Reinigungsmitteln imprägniertes Tuch zu verwenden.

Le décor a été réalisé avec de l'or jaune et des matières métallisées; par conséquent, le fond décoré ne peut être posé que sur le mur. Le décor n'est pas résistant à l'usure par frottement pendant et après la pose. Pour le nettoyage quotidien, nous recommandons d'utiliser un chiffon humide imprégné d'eau ou de produits neutres.

Nuove superfici ceramiche prendono forma in accordo con la natura. La ceramica è design al servizio dell'uomo. Del Conca progetta e costruisce un sistema di arredi per interni ed esterni ispirandosi alla natura, ai suoi elementi. Lavabi, tavoli, sedute, top e ampi piani di lavoro sono realizzati con grandi lastre in gres porcellanato dallo spessore sottile, una tecnologia che consente lavorazioni originali nell'ambito dell'interior design. Superfici interconnesse, da cui nascono piani e volumi traslati tra loro nello spazio per disegnare forme nuove ed esclusive.

New ceramic surfaces take shape according to nature. The ceramic material is design at the service of man. Del Conca designs and constructs a system of indoor and outdoor furnishings taking its inspiration from nature and the elements. Washbasins, tables, seats, counters and large work surfaces made from large, slimline porcelain stoneware slabs, a technology that brings original craftsmanship to the field of interior design. Interconnected surfaces that create planes and volumes which are mixed and matched in the space to design new, one-of-a-kind styles.

Neuartige keramische Oberflächen im Einklang mit der Natur – das ist Design im Dienste der Menschen. Del Conca entwickelt und fertigt ein Einrichtungssystem für Innen- und Außenbereiche, das sich von der Natur und allen ihren Elementen inspirieren lässt. Mit großen Feinsteinzeugplatten in geringer Stärke ausgeführte Waschbecken, Tische, Sitzelemente, Waschtische und großzügige Arbeitsplatten – eine Technologie, mit der sich originelle Projekte für die Innenraumgestaltung umsetzen lassen. So können miteinander verbundene Oberflächen geschaffen werden, die Ebenen und Bereiche mit fließenden Übergängen und neuen exklusiven Formen entstehen lassen.

Del Conca s'inspire de la nature et de ses éléments pour imaginer et pour réaliser son système déco intérieur et extérieur. Lavabos, tables, assises, plans de toilette et grandes surfaces de travail sont fabriqués avec de grandes dalles en grès cérame de fine épaisseur, une technologie qui permet de mettre en œuvre des façonnages originaux en décoration d'intérieur. Des surfaces interconnectées à partir desquelles apparaissent plans et volumes qui se déplacent dans l'espace pour dessiner des formes nouvelles et exclusives.

CARATTERISTICHE TECNICHE E NORME INTERNAZIONALI TECHNICAL CHARACTERISTICS AND INTERNATIONAL STANDARDS TECHNISCHE MERKMALE UND INTERNATIONALE NORMEN CARACTERISTIQUES TECHNIQUES ET NORMES INTERNATIONALES

Le nostre piastrelle di 1^a scelta sono prodotte e scelte in base alla normativa europea EN ed internazionale ISO. Questa significa che il 95% delle piastrelle contenute nelle confezioni di prima scelta devono avere caratteristiche d'aspetto conformi alla norma; pertanto non devono essere perfette (cosa impossibile per un qualunque prodotto industriale) ma devono avere delle tolleranze contenute entro i limiti della norma.
Queste tolleranze e quelle relative alle altre caratteristiche fisiche e chimiche del prodotto sono riportate in calce. La valutazione dell'aspetto della piastrella deve essere fatta osservandola perpendicolarmente da 1 m. di distanza. I difetti delle piastrelle possono essere di due tipi: palesi (visibili già prima della posa, come differenza di tonalità, difetti di superficie, rotture, ecc.) o occulti (non visibili prima della posa).

I difetti palesi vanno contestati solo prima della posa. Questo consente al produttore di sostituire eventualmente il materiale difettoso. Qualora l'acquirente o l'installatore decidano comunque la messa in opera, la responsabilità del produttore decade.

La responsabilità per difetti occulti, purché contestati entro i termini di legge, è del produttore.

Our 1st choice tiles are manufactured and selected according to European EN and International ISO regulations. This means that 95% of the contents of first choice must have appearance characteristics corresponding to the standards.

Therefore they must not be perfect (which is impossible for any industrial product) but must have tolerances comprised within the standard limits. These tolerances and those concerning the other physical and chemical characteristics of the product are reported below.

The appearance valuation of the tile must be done examining it (perpendicularly) from 1 meter of distance.

Defects of tiles can be of two types: noticeable (already visible before laying, such as color differences, surface defects, fractures, etc.) or hidden (not visible before laying). Complaints about noticeable defects may be made only before tiles are laid, allowing the producer to replace any faulty material. However, if the buyer or tile layer decides to proceed with laying, the responsibility of the producer is invalidated.

Responsability for hidden defects, if these are notified within the legal time limits, lies the producer.

CONSIGLI PER L'IMPIEGO • RECOMMENDATIONS FOR USE • EMPFEHLUNGEN FÜR DEN GEBRAUCH • CONSEILS POUR L'EMPLOI

I risultati delle prove di laboratorio non sono sufficienti a determinare la durata di un pavimento. A parità di calpestio essa è influenzata oltre che dalle caratteristiche tecniche del prodotto, anche dal luogo di impiego e della maggiore o minore presenza di sostanze abrasive. Pertanto consigliamo di scegliere il prodotto con le caratteristiche di resistenza all'usura sufficienti all'utilizzo in base allo schema che segue ma anche di proteggere, ad esempio con l'utilizzo di zerbini, i pavimenti dalla presenza di sabbia o sostanze graffianti.

No laboratory test, however efficient it may be, is sufficient to determine the durability of a product. Apart from the obvious factor of the number of foot contacts, durability can also be influenced by the technical characteristics of the product, the place of installation and the possible presence of abrasive agents. We therefore recommend not only that products should be chosen with resistance characteristics that are sufficient for the intended use, as shown in the following chart, but also that wherever necessary, floors should be protected against sand, grit and other abrasives by the use, for example, of mats.

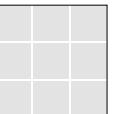

Die Resultate von Laborversuchen reichen nicht aus, um die Lebensdauer eines Fußbodens zu bestimmen. In gleichem Maße wie durch Begehung, ist er - außer durch die technischen Charakteristiken des Produktes - auch durch den Verwendungsort und die dort vorhandene größere oder geringere Menge schleifender Substanzen beeinflusst. Deshalb empfehlen wir die Auswahl des Produktes nach solchen Haltbarkeitscharakteristiken, wie sie das folgende Schema darlegt, und außerdem, die Fußböden z. B. durch Gebrauch von Fußmatten vor Sand oder kratzenden Substanzen zu schützen.

Les résultats des essais de laboratoire ne peuvent à eux seuls déterminer la durée d'un pavement. A parité de passage, celle-ci, outre à dépendre des caractéristiques techniques du produit, dépend aussi du lieu d'emploi et de la présence plus ou moins importante de substances abrasives. Pour cela, nous conseillons de choisir le produit présentant des caractéristiques de résistance à l'usure en rapport avec l'utilisation à laquelle il est destiné sur la base du schéma reporté ci-après et de protéger les pavements, à l'aide de paillassons ou autre, du sable ou de toute substance pouvant les rayer.

Attenzione all'ambiente e al mondo

FOCUS ON THE ENVIRONMENT AND PEOPLE'S WELL-BEING
 AUFMERKSAMKEIT GEGENÜBER DER UMWELT UND DER WELT
 L'ATTENTION PORTÉE À L'ENVIRONNEMENT ET AU MONDE

Il rispetto dell'ambiente, delle risorse naturali e il contenimento dei consumi energetici è da sempre un obiettivo che l'azienda segue con costanza e attenzione, per fornire ai propri clienti un prodotto che, oltre ad avere caratteristiche estetiche e tecniche di elevato livello, sia realizzato secondo criteri di sostenibilità. La politica ambientale è attuata attraverso sia l'aggiornamento e l'installazione di nuovi impianti sia la sensibilizzazione dei propri dipendenti e fornitori verso i temi di ecologia e di risparmio energetico.

Di seguito alcuni esempi concreti: il completo riutilizzo interno delle acque industriali prodotte durante il ciclo di lavorazione proprio e di terzi; la riduzione delle emissioni di CO₂ in atmosfera di oltre 3.400 tonnellate; un impasto ceramico con oltre l'8,5% di materiale riciclato; il 100% di cartone utilizzato è riciclato; il 70% di plastica utilizzata è riciclata; il 98% dell'energia elettrica utilizzata è autoprodotta; il Centro Logistico del Gruppo è totalmente indipendente a livello energetico.

Protection of the environment and natural resources and energy saving are goals the company has always pursued with constant determination, to supply customers with a product that not only delivers outstanding appearance and technical characteristics but is also manufactured to sustainability criteria. The environmental policy is implemented through both modernisation and the installation of new plants and engagement to raise the awareness of employees and suppliers on issues of ecology and energy saving. The figures speak for themselves: complete in-house reuse of industrial wastewater produced during its own and third-party processing cycles; reduction of atmospheric CO₂ emissions by over 3,400 tonnes; ceramic body mix including more than 8.5% recycled material; use of 100% recycled cardboard; use of 70% recycled plastic; in-house generation of 98% of electricity used; complete energy-independence of the Group's Logistics Hub.

Der Schutz der Umwelt, der natürlichen Ressourcen sowie die Reduzierung des Energieverbrauchs stellen seit jeher Ziele dar, die das Unternehmen konsequent und sorgfältig umzusetzen versucht, um seinen Kunden Produkte zu bieten, die nicht nur durch ihre ausgezeichneten ästhetischen und technischen Eigenschaften bestechen, sondern auch im Einklang mit Nachhaltigkeitskriterien hergestellt wurden. Unsere Umweltschutzpolitik kommt sowohl in Form von Aufrüstungen bestehender bzw. Installationen neuer Anlagen als auch mittels der Sensibilisierung unserer Mitarbeiter und Lieferanten für Umweltschutz und Energieeinsparung zum Ausdruck. Dies sind einige konkrete Beispiele: die vollständige Wiederaufbereitung industrieller Abwässer, die bei unseren eigenen Produktionsprozessen und bei der Produktion von Dritten entstehen; die Reduzierung von CO₂-Emissionen um 3 400 Tonnen; eine Keramikpâte mit über 8,5 % recyceltem Material; 100 % des verwendeten Kartons wird recycelt; 70 % des verwendeten Kunststoffs wird recycelt; 98 % des genutzten Stroms wird selbst produziert; das Logistikzentrum der Gruppe ist vollständig stromunabhängig.

Le respect de l'environnement et des ressources naturelles et la maîtrise de la consommation d'énergie ont toujours été un objectif que l'entreprise poursuit avec constance et attention, pour fournir à ses clients un produit qui, en plus d'avoir des caractéristiques esthétiques et techniques de haut niveau, est construit selon des critères de durabilité. La politique environnementale est mise en œuvre à la fois par la mise à jour et l'installation de nouveaux systèmes et par la sensibilisation de ses employés et fournisseurs aux questions d'écologie et d'économie d'énergie. Voici quelques exemples concrets : la réutilisation interne complète de l'eau industrielle produite lors de son cycle de traitement et celui de tiers ; la réduction des émissions de CO₂ dans l'atmosphère de plus de 3400 tonnes ; une pâte céramique contenant plus de 8,5 % de matériaux recyclés ; 100 % du carton utilisé est recyclé ; 70 % du plastique utilisé est recyclé ; 98 % de l'électricité utilisée est autoproduite ; le centre logistique du Groupe est totalement autonome énergétiquement.

Ecology and beauty, innovation and heritage, sustainability and state-of-the-art: achieving the fusion of such diverse factors in a design project is not easy, but it can be done. Research and passion are fundamental for transforming an industrial product into a low environmental impact project.

Es wurde eine hochmoderne Anlage installiert, die die Reduzierung unserer jährlichen Kohlendioxid-Emissionen um **3400** Tonnen **CO₂** ermöglicht; dies entspricht den Abgasen von **1300** Pkws, die durchschnittlich **20000** km pro Jahr zurücklegen.

Umweltschutz und Ästethik, Innovation und Erbe, Nachhaltigkeit und Avantgarde: solch unterschiedliche Aspekte bei der Ausarbeitung eines Designprojekts zu vereinen, ist nicht einfach, aber es ist durchaus möglich. Forschung und Leidenschaft sind zwei wesentliche Pfeiler, um ein industrielles Produkt in ein Projekt mit geringer Umweltbelastung zu verwandeln.

Une usine de nouvelle génération est née, capable de réduire les émissions de plus de **3400** tonnes de **CO₂**, équivalent de la pollution de **1300** voitures parcourant **20000** km/an.

Écologie et beauté, innovation et héritage, développement durable et avant-garde: fusionner des aspects aussi différents dans la finalisation d'un projet de design n'est pas facile, mais c'est possible. La recherche et la passion sont essentielles pour transformer un produit industriel en un projet à faible impact environnemental.
