

Over 70 Years of Italian Craftsmanship Excellence

Our story holds the warmth of metal and the care of human hands.

Since 1953, Zanetti Chini rubinetterie has been a workshop where material and passion meet.

Founded by Giuseppe, a visionary craftsman, and now led by his children and grandchildren;

the company has grown while staying true to its essence: doing things well, with care.

Every faucet is the result of a living tradition, flowing through the hands of artisans and shaped into a modern, timeless language.

A Family Business with an International Outlook

Our strength lies in a lean structure, deeply rooted in our territory yet open to the world.

We are 'small', and that allows us to be fast, flexible, and present.

Every customer is unique, and every project is heard, interpreted, and brought to life with the sensitivity only a family-run company can offer.

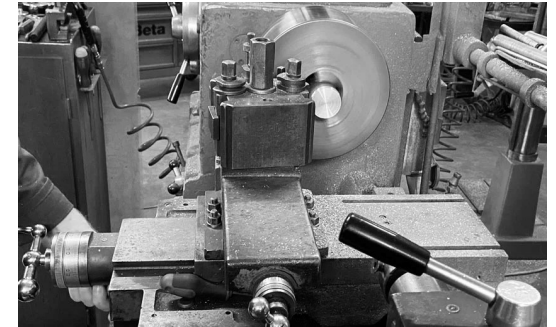

The Charm of Raw Material: Where Everything Begins

At the heart of our factory in San Maurizio d'Opaglio,

brass – a noble alloy of copper and zinc – is worked with great skill.

Bars take shape on lathes, are hand-polished, patiently refined, and expertly treated in our galvanic and painting departments.

Every step is carefully monitored, every detail intentional. Our production is art applied to water.

Infinite Finishes. Infinite Possibilities.

From chrome to rose gold, from corten to pompeii, and any shade from the RAL chart: every color, every texture can be selected to match the project's style.

Our faucets adapt, integrate, transform.

There are no limits to customization when craftsmanship meets technology.

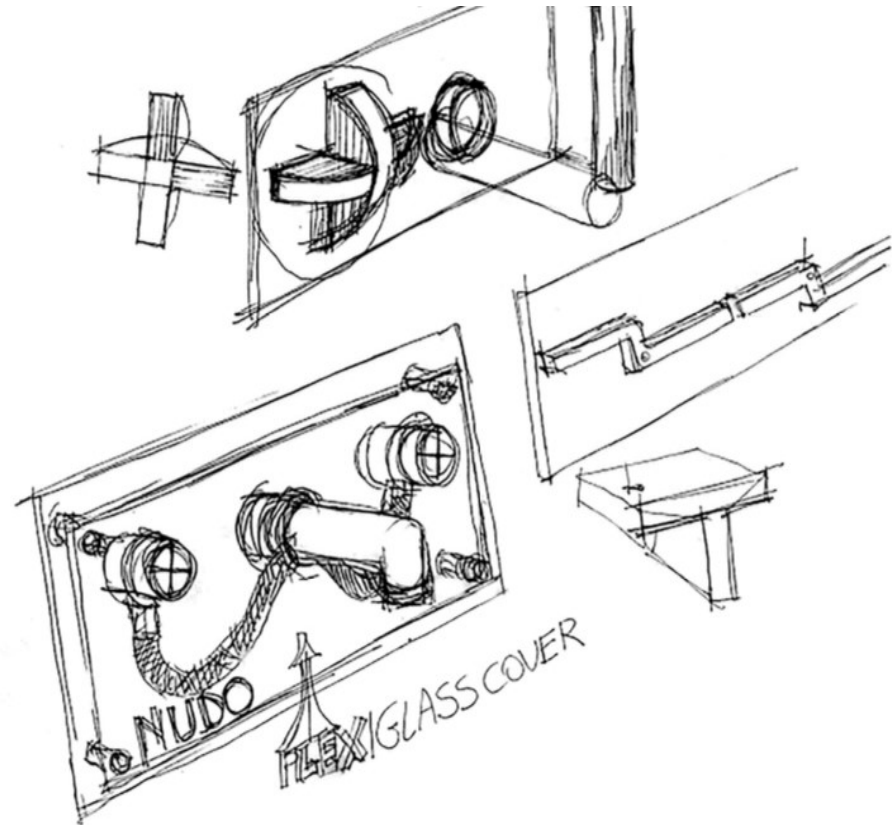

Made to Measure: The Luxury of Precision

We create custom faucets because we believe every space deserves its own character.

We work from drawings, modify proportions, develop details together with designers.

Our craftsmanship serves the creative freedom of those who imagine and build.

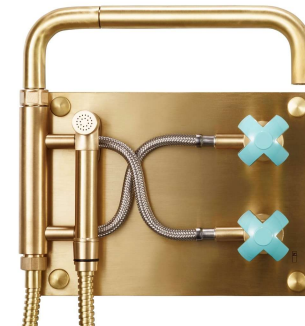

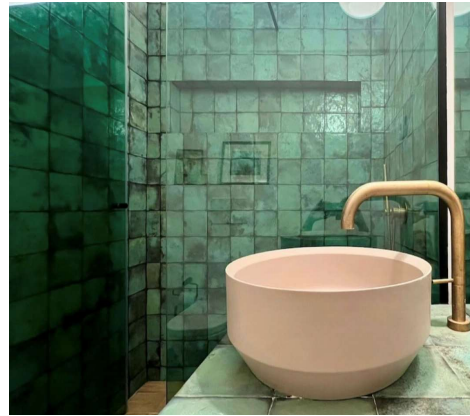

Designers and Planners: A True Relationship

With designers like Christophe Pillet and Giovanni Garrone,

we share visions, ideas, and paths. It's not just a project, but a shared journey.

Our collections are born from this living relationship:

objects that speak the language of elegance, functionality, and design culture.

Tangible Value You Can Feel

Every faucet we produce is designed to last and to inspire over time.
Behind every lever, every spout, there is meticulous work made of trials, checks, and manual assembly.

A Zanetti Chini rubinetterie product is never ordinary:
It has a technical soul and an aesthetic skin designed to leave a mark.

Ethics, Quality, Responsibility

We produce entirely in Italy, use safe materials, and make sustainable choices.

Every box is plastic-free, every faucet tested, every component traceable.

Being artisans today also means being responsible.

And we are, in every detail.

Our World: Hotels, Villas, Spaces to Live In

Zanetti Chini rubinetterie is chosen by architects and interior designers for exclusive projects worldwide: from boutique hotels to international resorts, from historic residences to contemporary developments.

Every installation is a story that flows with water.

***Zanetti Chini Rubinetterie :
The Poetry of Water, The Strength of Craft***

When you open one of our faucets, you're not just using a functional object.
You're connecting with a story, with knowledge passed down, with a concrete idea of beauty.

This is our way of interpreting luxury:
with authenticity, respect, and passion.
